INTRODUCTION.

IN no nation does the history of its early institutions possess more interest than those of our own country, where, whilst associating for "the mutual good," the germ of self-government was carefully guarded, and the embryo master-spirits fostered, who contributed finally to mould a nation's destinies.

One of the earliest Associations in Pennsylvania, and perhaps the oldest now existing, is The Carpenters' Company of the City and County of Philadelphia, maintaining an uninterrupted organization from the year 1724, about forty years after the settlement of the colonial government by William Penn. Among the early associators were many whose names are prominent in colonial history, and whose architectural tastes are impressed on the buildings that yet remain, memorials of that early day.

James Portius, whose name is second on the list of members, designed and executed Penn's mansion, on Second Street above Walnut; and the lively interest he felt in the association with his fellows, induced him at his decease, in 1734, to bequeath his works on architecture to the Company.

Edmund Wooley, from plans by Robert Smith (both members), erected the "State House," on Chestnut be-

tween Fifth and Sixth Streets, assisted by the amateur labors of Dr. J. Kearsley.

The primary object of the Association was to "obtain instruction in the science of architecture; to assist such of its members, or the widows and children of members, as should be by accident in need of support," and the adoption of such a system of measurement and prices "that every one concerned in building may have the value of his money, and every workman the worth of his labor." The difference between the plain, simple buildings erected in the province and those in the "mother country" was such, that it became necessary to examine the "method of measuring," as according to the "system practised in England," the prices were "set on the general and not on the particular parts of the work."

The price of admission (thirty shillings) led, after the lapse of a few years, to the formation of a similar association, under the title of "The Second Carpenters' Company," but after a few years of separate existence, their efforts for a union with the first Company were successful, and they, according to their own declaration, "joined and became members of the old Company," in 1752.

To build a Hall for the use of the Company was an object of early interest, and the minutes show, by the appointment of committees to fix upon "a proper lot of ground," that it was never lost sight of. A determined effort was made in 1763, but it was not attained until 1768, when the present "lot on Chestnut Street" was purchased, at an annual ground rent of "176 Spanish milled pieces of eight," and conveyed to trustees appointed by the Company. Many schemes for its improvement were suggested. A proposition to unite with the Library Company of Philadelphia in erecting a "building that might accommodate both," was, among

others, seriously entertained, but no feasible plan was matured until 1770, when, "as the funds were not sufficient," it was agreed to open a subscription among the members of the Company, in shares of four pounds each, and when the sum subscribed shall amount to "three hundred pounds," the Company, shall "appoint a number to begin to erect a building." Robert Smith prepared "a sketch of a building," and the subscription paper having been filled in about one week to the required amount, a certificate was given to each subscriber, entitling, "according to the sum advanced," to receive a dividend "as often as rents of the building shall be received by the Company's treasurer."

The fee of admission was raised in 1769 to four pounds. This caused the formation of "The Friendship Carpenters' Company," whose admission fee was "five shillings." It was not long before overtures were made to "their elder brethren" on the "different methods used in measuring and valuing carpenter work." To this it was replied, that the mode of measuring and valuing carpenter work pursued by their elder brethren was "more equitable, expressive, and satisfactory than any method practised in the city before, and was not inferior to the best method practised in any city in the King's dominions."

The plan of building being adopted, it was commenced on the "5th day of the second month, 1770." The duties assigned the building committee were "discharged with fidelity," and the building "so far completed that the annual meeting in 1771" was held therein, and during that year the Library Company of Philadelphia rented and removed "their library to the second story of the new building," where it continued until 1782. Though the amount subscribed was more than that proposed, yet it fell short of finishing the Hall;

hence the "outside finish of the doors and windows was deferred until the sums advanced by the several members were fully paid."

In 1775 the efforts of the Friendship Carpenters' Company to effect a union were renewed, and a committee of conference appointed; but it was not accomplished until 1785, when the members thereof, on "the payment of four pounds each to the treasurer, and signing the articles of association," were admitted into membership.

The Hall was freely used at the beginning of the Revolution. The committee appointed "at a general meeting of the inhabitants of the city and county" met therein on the second day of the sixth month, 1774, and "as Governor Penn had declined to convene the Assembly," they appointed three of their number to wait upon the speaker, and request "a positive answer whether he would call the Assembly together or not." They had the use of the Hall during their appointment.

On the 15th following, the "different county committees" met therein to consult the Philadelphia committee on "what was best to propose" to the General Assembly, which was to meet on the 18th inst. Their resolves "declaratory of the sense of the province," and the necessity for a "general congress of delegates from all the colonies," are matters of historical record. The regular quarterly meeting of the Company was not held, in order that these deliberations might not be interfered with.

AN ACT
TO INCORPORATE THE
CARPENTERS' COMPANY
OF THE
CITY AND COUNTY OF PHILADELPHIA.

WHEREAS it appears to this Assembly, that in Preamble. the year one thousand seven hundred and twenty-four, a number of the House Carpenters of the City and County of Philadelphia formed themselves into a Company, for the purpose of obtaining instruction in the science of architecture, and assisting such of their members as should by accident be in need of support, or the widows and minor children of members; and for the furtherance of the said charitable and useful designs, did for many years pay into the hands of the masters of the said Company considerable sums of money; a great part whereof was expended in the relief of their unfortunate members, and the remainder was appropriated, in the year one thousand seven hundred and sixty-nine, to the obtaining a large lot of ground, on which were several buildings and other improvements, and towards the erecting of the house known by the name of the CARPENTERS' HALL in the said city: *And whereas*, the members of the said Carpenters' Company have prayed, that they may be incorporated in such manner, as to secure the said estate, to them and to their successors, in order to further the useful and charitable design of the institution:

And whereas, this Assembly is disposed to exercise the power vested in the legislature of the commonwealth, for the encouragement of useful and charitable purposes; Be it therefore enacted, and it is hereby enacted by the representatives of the Freemen of the Commonwealth of Pennsylvania in General Assembly met, and by the authority of the same, That, for the purpose of promoting the useful and charitable objects before mentioned,

Resolved, That the illumination decorations be put in place, and lighted on each succeeding celebration of the anniversary of American Independence.

CARPENTERS' HALL.

IN a country so new as this, there can be but little, yet, of the interest which springs from the memories of the past,—from the storied recollections which cling to old places and things, and which now give to so many scenes in the old world, their never-dying interest; and even of that little here, the unsparing hand of what we call Progress, which too often tears down and destroys, only because its object has grown gray and venerable, deprives us of the lessons which these mute walls would give us, of the men who have figured, and the acts which have been done within them—lessons fraught with profitable instruction, with wisdom and patriotic impulses.

There are probably few associations in this country which can now trace an unbroken existence as far back as “The Carpenters’ Company of the City and County of Philadelphia,” nor are there many buildings which have so well stood the test of time, and been connected with so many stirring incidents of our Revolutionary history, as the old Hall which still belongs to it. Reverence for the memory of those who have gone before them, attachment for the old building which has been so intimately connected with the history of their country and their city, and a belief that its story is instructive and valuable, has induced its present members to withdraw the Hall from the purpose of trade and commerce for which it has been recently used, and to devote it hereafter to the objects of the Company, and the recollections of the past.

On the occasion of taking formal possession of the Hall on the 5th of September, 1857, the Managing Committee, in reporting their proceedings to the Company, took occasion

to accompany their report with various extracts from the minutes of the Company, and with the names of the officers of the Company from its date to the present time, as far as practicable.

The Company having directed that such portions of this report should be printed for the use of the members as might be deemed proper by the Managing Committee, the present brief summary of the History of the Association and its Hall, has been prepared in obedience thereto.

It was as early as the year 1724, about forty years after William Penn first landed on these shores, that the Master Carpenters of the City and County of Philadelphia organized an Association called the "Carpenters' Company."

The object of this Association, as expressed in the subsequent act of incorporation, was to obtain instruction in the science of Architecture, and to assist such of their members as should by accident be in need of support, and of the widows and minor children of such members.

Among the first results of this Association, was the fixing of a uniform scale of prices upon their work, so that the workman should receive a fair compensation for his labor, and the employer obtain a fair value for his money.

From this early beginning has come down the present "Book of Prices," by which all carpenter's work in the city of Philadelphia is regulated, and which is believed to be as just and equitable as it is possible to attain.

Some time after the parent Company was organized, another society was formed, having the same objects in view, but, in 1752, it united with the original body. Again in 1769, still another similar association was organized, which continued an independent existence until the year 1785, when, after negotiations through committees of each body, the last Company, called the "Friendship Carpenters' Company," was admitted into membership, and became part of the original association.

The minutes of the Company from 1724 to 1763, have unfortunately been lost, but sufficient data still remain to trace its continued existence by history.

In the year 1763 the attention of the Company seems to

have been first attracted to the construction of a hall, and a committee was appointed to select a suitable site for the purpose. It was not, however, until February 3, 1768, that the ground upon which the Hall now stands was procured. The original lot, 66 feet on Chestnut Street by 255 feet in depth, was purchased at an annual ground rent of 176 Spanish milled pieces of eight, of fine silver. A portion of this ground on its eastern side was subsequently sold, leaving at present an entrance to the Hall on Chestnut Street, by what is known as Carpenters' Court. The funds of the Company not being sufficient to erect the building, the necessary amount was raised by loan, principally among the members, and among its most valued relics, is still preserved, in a glass case, the original paper of subscription.

A plan being adopted, the building was commenced on the 5th day of February, 1770. It was soon found, however, that the amount raised was not sufficient to entirely complete the building; but the members being averse to incurring any considerable debt, it was resolved that the Company would occupy it in its unfinished condition, and accordingly the first meeting was held in the Hall January 21st, 1771. The building was not entirely completed until 1792.

On the 5th of September, 1774, the first Continental Congress met in the Hall, and commenced that series of deliberations which ultimated, on the 4th of July, 1776, in declaring the Colonies "Free and Independent."

When Congress met, Mr. Cushing made a motion that it be opened by prayer. Accordingly on the following day, the morning after news had been received of the cannonade of Boston, the Rev. Jacob Duché, then Pastor of Christ Church, opened the proceedings with a solemn prayer. "Washington was kneeling there, and Henry, and Randolph, and Rutledge, and Lee, and Jay, and by their side stood, bowed in reverence, the Puritan Patriots of New England, who at that time had reason to believe that an armed soldiery were wasting their humble households. They prayed fervently for America, for the Congress, for the province of Massachusetts Bay, and especially for the

town of Boston." "I saw the tears," said Mr. Adams, "gush from the eyes of the old pacific Quakers of Philadelphia."

On the 26th of October, Congress, having concluded its business, dissolved itself, but was called together again on the 10th of May, 1775, at the State House, where it afterwards continued to hold its sessions.

The Provincial Assembly also occupied the Hall for its deliberations during this and the following year. Christopher Marshall in his diary, under date of October 24th, 1775, says: "Past two, went and met part of Committee at Coffee House, and from thence went in a body to Carpenters' Hall, in order to attend the funeral of Peyton Randolph (the first President of the first Continental Congress), who had departed suddenly after dinner last first day, at the country house of Richard Hill; then proceeded to Christ Church, where a sermon was preached by Jacob Duché; then to Christ Church burial-ground."

When the British took possession, in 1777, of the city of Philadelphia, a portion of their army were quartered in the Hall, and continued there during the time they occupied the city. The soldiers made a target of the vane on the cupola, and several holes were drilled through it by their bullets.

In 1787 the United States Commissary-General of Military Stores occupied the Hall, and from 1773 to 1790 the books of the Philadelphia Library, then the nucleus only of the magnificent collection which now exists, were also deposited there. It is here worthy of remark, that during the time the British occupied the Hall, no loss was sustained by the Library Company, who, at the same time, occupied the second story; the officers without exception, left deposits and paid hire for the books borrowed by them.

In 1777 the library room was occupied by the sick soldiery.

In 1791 the Society quit meeting in the Hall, and from that time to 1797 the building was occupied by the first Bank of the United States as a banking house. The Bank of Pennsylvania also transacted its business therein during 1798, 1799, and 1800.

In 1797 and 1798 the United States used it as a Land Office, and from 1802 to 1817 the Government occupied it as

a Custom-House, at which latter time the second Bank of the United States took possession and continued there until 1821. In 1822 the Musical Fund Society held its meetings within the Hall, followed in 1825 by the Franklin Institute, who occupied it for its sessions, and in 1827 the Society of Friends used it as a meeting-house.

During the Revolutionary period, the Carpenters' Hall was also used for the sessions of various temporary organizations intimately connected with the stirring events of that time. Thus, for instance, the various city and county committees convened for mutual council and defence, as well as meetings for the establishment of American manufactures of wool, cotton, flax, &c., were held within it.

Many of the members of the Company have at different times occupied prominent positions in the social, political and Revolutionary history of Philadelphia, and the names of the progenitors of many of our best-known citizens will be found recorded on its rolls. Few, especially of the older public buildings, were constructed without the aid of its associates, and even down to the present day, most of the important public improvements have had the benefit of the practical skill and knowledge of its members.

The State House, commenced in 1729, and finished in 1734, was built by Edmund Wooley, a member, from the plan of Robert Smith, as architect, also a member, assisted by the amateur labors of the Rev. J. Kearsley, who had considerable skill and taste in architectural matters. Penn's Mansion, still existing in Second Street, above Walnut, and one of the oldest memorials of the past yet left to us, was constructed by Jos. Portius, another member, who, upon his death, which occurred in 1734, bequeathed to the Company all his books on architecture.

The contributions of its members and the increase in the value of its property, has enabled the Carpenters' Company to accomplish much good, and to extend efficient assistance to necessitous members, and especially to their widows and orphans. Among the proudest testimonies to the Society, is the fact that several well-known men in this community, who are recognized as useful citizens and successful busi-

ness men, owe their advantages in life to the education which the Company provided them under the obligation of their charter.

The Company are in possession of a well-selected library, numbering about 2500 volumes, which was commenced in 1736, and now embraces many of the standard works in all departments of knowledge, especially in those connected with the objects of the Association, which books are accessible, not only to each member, but also to all the inmates of his family.

In restoring their ancient Hall, the Carpenters' Company have adhered as closely as possible to the original plan of the building.

The first story, in which the Continental Congress assembled, has been carefully renovated, and various articles of furniture placed therein which tradition says were in use in 1774, as well as other articles made to conform as far as possible to their style and appearance. Prominent among these, on either side of the platform, are two old-fashioned chairs, which it is believed were used by the officers of that Congress, and which are labelled "Continental Congress, 1774." The upper rooms have been fitted up for the library, and the accommodation of the Superintendent.

In the future, it is the intention of the Company that this old memorial of the past shall be devoted to its original purpose, and aid in keeping alive the interesting memories which attach to it; and with this view, strangers and citizens will be afforded an opportunity of visiting and inspecting this relic of the most interesting periods of the city's history.

REMINISCENCES.

At a meeting of the Carpenters' Company of the City and County of Philadelphia, held April 28th, 1856,* the following resolutions were unanimously adopted:

"1. *Resolved*, That it is expedient for the Company to remove as soon as possible to the old Hall. Meeting of Company, April 28, 1856. Resolutions in relation to occupying old Hall.

"2. *Resolved*, That the Managing Committee immediately take the necessary measures for obtaining possession, and fit up for the meetings of the Company, and for the accommodation of the Superintendent, the building on the south end of Carpenters' Court, known as Carpenters' Hall, and that in such fitting up especial care be taken to preserve as much as possible every feature in said Hall as it now exists indicative of its original finish."

Agreeably to the foregoing resolutions, the Managing Committee, having obtained possession on the 23d day of May, 1857, proceeded to prepare the building for the use of the Company, and having completed the duty assigned them, agreed to notify the Company to meet this day, September 5th, 1857, being the eighty-third anniversary of the meeting of the first Congress in this Hall. Acts of Committee.

* This meeting was held in the usual place, second story of building, west side of court.

*To the Carpenters' Company
of the City and County of Philadelphia.*

Report of Managing Committee.

The Managing Committee, who were charged with the duty of fitting up the old Hall, report the same completed and now ready for occupation by the Company.

On the 4th ult., the second story being nearly completed, the family moved in, and on the 15th ult. the Committee met for the first time in their room. This was done in order the sooner to let the building lately occupied by the Company.

The Committee present to the Company the following statement (being extracts from our minutes), as matter worthy of record, and as a means in future of easy and useful reference.

Now we, the subscribers, having considered the above proposal, do promise to pay to the treasurer appointed by the Carpenters' Company the several sums that stand against our names, as soon as £300 is subscribed and the foundation of the building is laid. Witness our hands, &c.

Form of subscription.

The above copy of subscription paper having been several times read, was agreed to, and then the members present proceeded in signing it, and the persons before named were appointed to apply to the rest of the members and others, to endeavor to get what they could added to the subscription already begun, and when they have got £300 subscribed, the Company are to be called together in order to nominate persons to undertake the care and oversight of erecting the Hall.

Committee to procure subscribers.

FEBRUARY 5th, 1770.

The subscription paper being nearly filled up to the sum required, the Company were warned, and met at their own house (on this day) in order to consider of a plan and dimensions for a Hall. It was proposed in the first place to fix on the dimensions, which after being considered was agreed should be 40 by 50 feet, or not to vary more than a foot more or less, that to be left with the committee who shall be appointed to see it carried out. The following twelve members were appointed as a Building Committee, viz.: Robert Smith, Benjamin Loxley, Abraham Carlile, James Pearson, John Goodwin, James Bringhurst, Gunning Bedford, Joseph Rakestraw, Thomas Nevel, James Worrell, John Thornhill, and Thomas Shoemaker.

1857. Entrance fee one hundred dollars.
1859. City Councils propose to purchase the Hall because of its historical interest and association with the early events of our national existence. The proposition was respectfully declined.

The following appeared in the North American and United States Gazette in June, 1859, in relation to this subject:

CARPENTERS' HALL.

Of the cherished objects yet among us, mementos of the "early times," that are regarded with veneration and held

sacred from the hand of "modern improvement," and "progression," none possess more thrilling interest, or were the theatre of more anxious deliberations, than the "Hall" of the Carpenters' Company of the City and County of Philadelphia. We may venerate, but cannot enter into the patriotic devotion that offered its use to the popular cause, whilst the Royalist pointed to its certain confiscation and the ruin of the Company.

It is a source of just pride that it is accessible to the public, whether citizens or strangers, and is visited even by subjects of the monarchies of Europe, being freely shown by the attentive Superintendent having it in charge. It was here that the delegates of the "town meeting" met in June, 1774, to request Governor Penn to convene the Assembly, and on his refusal appointed three of their number to wait upon the Speaker, and request a positive answer whether he would do it or not. Here the representatives of the different County Committees met to confer with the Philadelphia Committee, and prepare their resolves as the sense of the Province on the then existing state of affairs, and the necessity of a general Congress of Delegates from all the Colonies.

Within its sacred inclosures, when our own State House was closed against them, met the band of patriots who composed the First American Congress, who, conscious of the impending perils of the movement, resolved that all their transactions, except such as they should resolve to publish, should be kept inviolably secret.

Here Henry, Hancock and Adams inspired those delegates with nerve and sinew for the toils of war. Here, with the news of the cannonade of Boston bursting upon them, arose the first prayer in Congress. "Washington was kneeling here, and Henry, and Randolph, and Rutledge, and Lee, and Jay, and by their side stood, bowed in reverence, the Puritan patriots of New England, who at that time had reason to believe that an armed soldiery were wasting their humble households. They prayed fervently for America, for the Congress, for the Province of Massachusetts Bay, and especially for the town of Boston. I saw the tears," said the venerable John Adams, "gush from the eyes of the old

pacific Quakers of Philadelphia." Here they deliberately avowed that to the oppressive acts of the mother country, Americans cannot submit.

Here the Provincial Conference held their sittings; here they resolved to call a Convention to form a new Government for the Province, that should derive all its authority from the people only. I should not have troubled you, Mr. Editor, by thus referring to Carpenters' Hall, but for the passage of a resolution by our City Councils having reference to its purchase, which may induce some of our fellow citizens to suppose such a thing possible. To such I would say, that the Carpenters' Company is one of the oldest in the United States, having been instituted in 1724; that they built the Hall for their own, use it as such for their own accommodation, and that they have no idea of parting with it; and to Councils, as Henry Pratt said to Joseph Bonaparte on a like occasion, that they "have not money enough to buy it."

1860. The Convention for the Erection of a Monument to the Signers of the Declaration of Independence, assembled and held their meetings in the Hall.

OCCUPANTS OF OLD HALL,

RULES

FOR THE

Library of the Carpenters' Company

OF THE CITY AND COUNTY OF PHILADELPHIA.

1st. No person but a member of the Company, and those of his family, residing with him, shall be allowed the use of the Library, except by special permission of the Managing or Library Committee.

2d. The Librarian shall loan for six weeks to those entitled thereto one book, and no greater number unless connected so as to be otherwise useless; and may renew it for a similar time, unless application shall have been made by another member for the same book, and the Librarian required to take a memorandum thereof.

3d. Each member shall furnish those of his family, who may use the Library, with a permit directed to the Librarian before their using it; and such member shall be responsible for all books loaned thereon, or fines incurred, until said order is withdrawn.

4th. Books returned are to be delivered into the hands of the Librarian, to be examined whether damaged or not, and any person who shall retain any book or books longer than the time above specified shall forfeit, and pay to the Librarian, ten cents per week for lent books.

5th. It shall be the duty of the Librarian to notify the Secretary of the Library Committee, of all books remaining out beyond the time specified in Rule 2d, and pay all fines received to the Wardens, and furnish them, previous to each stated meeting of the Company, with an account of all fines unpaid, which shall be entered upon the notices of such members, and collected with the other dues of the Company.

6th. In case a book shall have been lost or injured, the damage shall be assessed by the Library Committee, and the amount paid by the borrower before they can be again permitted to use the library.

7th. Any member wanting a book not on the catalogue, must apply to the Library Committee, who may, if they think proper, procure the same.

8th. Any member transgressing the above rules, shall be reported by the Library Committee to the Company at their next stated meeting.
